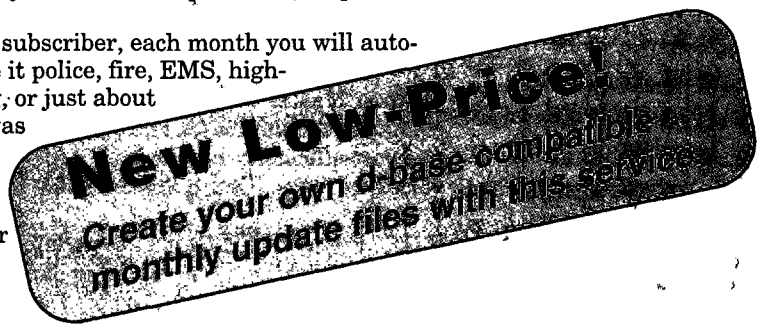
National Products & Services

Monthly F.C.C. Disk Update Subscription Service

Scanner Master is excited to offer a unique new product: a monthly F.C.C. Data Update Subscription Service.



What makes this service so special is that, when you sign-up as a subscriber, each month you will automatically be mailed a disk of the latest updates for your state. Be it police, fire, EMS, highway, local government, media, business, manufacturing, trunking, or just about any other type of licenses, you'll be able to review everyone who was granted new or renewed licenses only weeks after the F.C.C. approves the applications. You can download the information to your existing state database to keep it fully updated, and/or you can prepare your own monthly reports by creating spreadsheets or other d-base compatible files. You can also purchase our $10.00 Scanner Master program (or request it free with a yearly subscription). All this for only $4.95 per month!!!

This subscription service offers up-to-the-minute information on the frequency to which your favorite agency or business might soon be switching. You'll receive this service each month automatically, without having to order individual monthly disks from our office. You can receive a discount by paying for a year's subscription in advance, or you can have your credit card automatically billed monthly as we ship out the disks. If you're in the public safety or two-way field, this is an inexpensive way to keep track of who grabbed which frequency or who has modified their license.

Using our custom Scanner Master program to manage the monthly updates works like an absolute charm. Any licenses which are simply renewals will only update the expiration date of existing licenses, not dump in a duplicate of a license that already exists. If you've added your own PL tone or comment about the license, none of your work will be removed; only the expiration date will be updated. This way, you can keep your master database right up-to-date without clogging it with megabytes of duplicate licenses.

When ordering, please specify the state(s) which you would like to receive each month. All disks are 3.5" only. Using the product code, please also indicate whether you would like to take advantage of the discount by signing up for the year-in-advance service, or whether you would like to have your credit card charged automatically on a monthly basis.

Order #DUxx/M (fill in state): **$4.95 + .95¢ s/h** Recurring charge billed each month to a credit card.
Order #DUxx/Y (fill in state): **$49.95** For a one-year subscription. Includes shipping and handling charges.

F.C.C. Data on Disk

Order F.C.C. data on disk for any state in the nation for only $29.95 per state. The data comes to you on DOS disks (3.5") with the following delimited fields: frequency, call sign, licensee name, service, licensee city and state; transmitter city and state; transmitter type (repeater, etc.); longitude and latitude; number of mobiles, portables, air, marine and pager units; and license expiration date. Most F.C.C. licenses are covered, including: police, fire, EMS, highway maintenance, forestry, local government, trunked and conventional 800 MHz public safety, trunked 800 and 900 MHz repeater outputs, taxis, towing, news media, motion picture, industrial, general business, and many others. (GMRS, pagers, air, repeater inputs and other very minor services are not included.)

You can transfer the data into our database program (see below), or you can use your own dbase compatible program. Allow for between 5 and 20mb of hard-drive memory, depending on the size of the state.

SPECIAL OFFER: Receive a custom program to run your F.C.C. data for only $10.00. See below for more details.

For only $39.95, you can receive not only the F.C.C. data for any state, but also the customized Scanner Master Frequency Database Management Program. The program easily stores and sorts both the databases. With this program, you can sort on frequency, licensee name, licensee city, transmitter city and more. The program also provides an open field for you to enter PL tones, as well as a lengthy field for you to add your comments ("Police F-3, Detectives"), and other information to each license. You can view and edit an entire record on a single screen by hitting the "E" key, or you can select the field order in which you prefer to view the license data: by frequency, by licensee city, by transmitter city, alphabetically by user, etc. You can create your own databases as well. A function that is completely unique to the Scanner Master program is the ability to "mark" records with a two-digit code for building your own on-screen reports of selected files. This non-windows, DOS program is simple to install and even easier to use.

One of the great features of the program is the ability it provides to merge monthly F.C.C. updates into your existing database. See below for details. (Note there is very limited print functionality with the program. It is primarily an on-screen utility.)

Order #DSKxx (fill in state): **$29.95** per state without program
Order #DSKxx/P (fill in state): **$39.95** per state with program

(Note: If you are ordering multiple states, you only need to purchase the program once. Also, if your order consists only of disks, add $3.95 S/H for First Class, rather than $5.95.)
